W3RM: ARRL Atlantic Division Ham of The Year

By now most of you know that our own Dick Moll, W3RM, has been selected as the 2006 ARRL Atlantic Division Ham of the Year.

He now continues a tradition by joining some very distinguished company, as several Phil-Monters have been honored by the Atlantic Division's Ham of the Year and Grand Old Ham awards in the past, including Jim W3BBB, Rollie W3PWG and Jake AK2I.

The announcement from Atlantic Division was published at their website and in the ARRL Letter, but we'd like everybody to see the more detailed nominating letter prepared by Bob Thomas W3NE, who gathered up information from sundry sources and wrote a marvelous presentation.

Richard A. Moll, W3RM

There are hams who eat and breathe amateur radio, but Richard Moll has gone far beyond the confines of the hobby as a well-rounded, public-spirited ham who has chalked up a remarkable record of service and achievement in our field, but also as an exemplary human being dedicated to helping people in need. The presentation that follows will illustrate not only W3RM's stellar amateur radio accomplishments, but the

way he has combined his ham activities, to this very day, to benefit a broad swath of deserving humanity.

As he was getting interested in ham radio, Dick was fortunate to be a neighbor of Brad Martin, W3QV, who taught him the fundamentals of radio with emphasis on practical operating skills. Brad had been active in the ARRL as Director and SCM, and he instilled in Dick a love of CW and traffic handling. Thus, when his first ticket arrived ca.1948 and he got on the air as W3PDJ, Dick immediately became immersed, not so much in DXing - that was to come later - but primarily handling ARRL NTS traffic on the EPA Net on 3610 kc., a frequency tuned so often it is claimed by some to be "corroded" into his dial. His ardor for traffic handling also drew him to the 40-meter SSN (Swing Shift

Net) and it was not long before he had *two* ARC-5 rigs in operation at once, one on 80 and the other on 40, transferring traffic every evening between the EPN and SSN. Not bad for a high school kid who was simultaneously being called to dinner by his anxious mother!

All through high school Dick and his close pal, Harry Martin, W3PSH, Brad's son, became totally immersed in ham radio. The enthusiastic pair conducted radio and code classes for any schoolmate they could snare. Dick even taught code to his sister, saw her through licensing, and then built a compact rig to enable her to keep in touch with the family while away at college. Dick and Harry became active in the Keystone Amateur Radio Association, a small club that opened new opportunities with intense Field Day participation, especially for hot operating on 40 CW, where Dick excelled by his uncanny ability to simultaneously copy three calls at once: the one

in contact, one above frequency, and another below! Dick's sending is impeccable, described by Brad Martin as, "as good as a machine."

But life is made of adversity as well as success. A seminal event occurred in Dick's life when Harry Martin - his best buddy - was tragically killed in an airplane accident. The two had been so close, and Dick's sorrow so profound, that he was able to overcome his grief only by radically reshaping his life's ambitions because, as he confided to his sister, "now I have two lives to live." And indeed he has done that - and more!

One of the ways Dick fulfilled his vow to honor Harry Martin was through participation in the Big Brothers Association of Philadelphia, where he became a member of the Board of Directors. Over the years, Dick successfully mentored several young boys through their perilous teenage years and into early adulthood. In fact, Dick became foster father to the son of an earlier charge who had suffered an untimely sudden death. That "Grandson" and another foster son, have become successful in business, married and now have children of their own, who Dick proudly calls his "Grandchildren," and who fondly call him "Pop-Pop." One of the boys he raised has commented that, "He gave me a future." So close have they become, that in 1997 Dick legally adopted them as his sons and heirs. Now, that doesn't have anything to do with amateur radio. However, it speaks volumes about the character of the man, the same character qualities that he still brings

to every aspect of his rich association with amateur radio.

W3RM's amateur radio expertise converged with his dedication to serve in 1989 when a missionary from his church embarked on a Christian mission in Haiti. Prior to leaving home for Haiti, the minister's wife was coached by Dick in obtaining her Novice ticket, and he assembled a 10 meter station for installation at the mission. Those were turbulent times in Haiti, following a military coup supported by the U.S. government. There were horrific human rights violations, including random beatings of poverty-stricken civilians, murders of dissidents, torching of the mission, and a total ban on international telephone calls. Dick worked the Haiti station at dawn every morning, passing traffic for the mission hospital, handling personal messages and phone patches, and arranging on the U.S. end for delivery of radio and life support supplies. He did this for five years, becoming the lifeline for Americans struggling in an unspeakably hostile environment. Not only that, when another mission was later established in the Dominican Republic, Dick repeated his dedicated effort for them as well.

Fifty years ago, Hurricane Diane ravaged the East Coast and the Phil-Mont Mobile Radio Club responded. Dick had become interested in mobile operation years before when he and W3QV drove around the neighborhood with Brad's SW-3 in search of noise sources in the 10-meter band. He subsequently became active in

Phil-Mont and, as the club's emergency response took hold, Dick drove to Stroudsburg, PA. He was ferried in a row boat, carrying a battery powered two meter AM rig under his arm, across the rampaging river to isolated East Stroudsburg. Setting up his station in a jail cell(!), Dick handled vital emergency and health and welfare traffic continuously, the only link between East Stroudsburg and the outside world, until telephone service was restored twenty-four hours later. His close association with Phil-Mont has continued over the intervening years, but always in the background in unglamorous, but critical roles. The club can always depend on Dick's operating skill to rack-up a superlative Field Day score on 40 CW (Photo1); he was an ORS for many years, keeping us informed of latest news from ARRL Headquarters; he ran MCW code practice training sessions on our repeater every week, sending at speeds from 5- to 30-wpm in response to individual listeners' requests. His continuing service as Treasurer is a valued asset for smooth financial management, and beyond finances, Dick is a steadying influence in all club matters. As an independent endeavor, Dick established and administered with utmost integrity, the W5YI VE Testing Program in suburban Philadelphia.

Few people - even hams - will tolerate their sleep being disturbed by radio, but Dick willingly permits it, carrying on a tradition established in the 'fifties by Brad Martin. At that time, some eighty members of Phil-Mont had crystal-controlled radio gear in their cars and at home,

all operating on 29.493 Mc.(as we said then). Brad ran his monitor receiver 24-hours a day so, regardless of the time, anyone in difficulty had only to get on "the frequency," give a shout, and Brad would be right back for them. After the club migrated to a 2-meter repeater (not coincidentally with the call W3QV), Dick Moll continued the tradition of full-time monitoring, even enduring 4 AM kerchunkers, to ensure he will be available to help in case of a late-night emergency. How many clubs are blessed with a member possessing that kind of dedication?

One of the behind-the-scenes accomplishments by W3RM was acquisition of 501(c)(3) charitable status for Phil-Mont, opening the way for administration of the Claude R. Haring, Jr. W3IIM Memorial Scholarship, by the Foundation for Amateur Radio. Dick oversees the financial health of the fund, encourages donations, and recommends recipients to FAR. Another scholarship award has since begun through Dick's efforts submitting appropriate forms and soliciting donations. Again, however, his involvement goes well beyond those official duties. Recipients of the scholarships are young college-bound hams and university students. Some of the candidates have already benefited from Dick's amateur radio mentoring, and have used their ham activities as a means to demonstrate their capabilities and thirst for advancement. This year a recent recipient also benefited from Dick's business acumen. At a crossroads in a career decision whether to accept a corporate job or to become an entrepreneur in a field he loved, Dick

advised him to form his own business. Following Dick's advice and encouragement, the young fellow now counts several clients for his services as an independent Information Technology consultant. Dick Moll also pursues his hobby on a grand scale well beyond traffic nets, local club activities, and mentoring budding hams. His expanded horizon is exemplified by two DX-peditions he conducted with N3MT, another product of his mentoring who has developed into a well-rounded amateur highly proficient in CW operation. The first trip was in 2001 to Turks and Caicos, where they operated as VP5/W3RM, making 4500 contacts in just two weeks. The next year the duo traveled to Aruba where, as P40RM, they batted out 7500 QSOs within three weeks to DXers all over the world (Photo 2). And on top of that, Dick, a renaissance man if there ever was one, mastered the intricacies of scuba diving in several weeks of intensive training before embarking for the Caribbean so he could have a relaxing, physically stimulating diversion during breaks in the operating schedule.

Many major activities and accomplishments of W3RM have been recounted here, however, there are also numerous smaller, but no less significant, contributions to amateur radio worthy of note that he continues to carry on:

- ✓ Provides practical advice and encouragement to youngsters so they can set realistic goals for

becoming good hams without succumbing to "New Equipment Envy"

- ✓ Lends rigs to give newcomers a start
- ✓ Provides sound advice on design and construction of practical antennas (from a man who never owned - and never needed - a beam!)
- ✓ Explains to new hams how to operate equipment, become involved in traffic nets and be good citizens of ham radio
- ✓ Counsels us all when things go wrong
- ✓ Publicizes ham activities in the press
- ✓ Exercises patience in all of the above
- ✓ Emphasizes everything said in this entire document *by example!*

The Atlantic Division Website lists numerous criteria for the Ham of the Year Award. In reviewing our presentation, it is the hope of the Phil-Mont Mobile Radio Club that the judges will recognize that Richard A. Moll, W3RM, fulfills each and every one of those criteria to the fullest extent, and that he should be designated Ham of the Year for 2006.

Respectfully submitted,
Robert G. Thomas, W3NE
on behalf of the
Phil-Mont Mobile Radio Club, Inc.

Phil-Mont Awards Two Scholarship Grants for 2006

The annual Claude H. Haring, Jr., W3IIM, Memorial Scholarship for 2006, with \$2,000 grant, was awarded--for the second year in a row--to Benjamin E. Jack, N3VYA, of Huntingdon Valley. Selected by the Scholarship Committee of the Foundation for Amateur Radio, who administer our club's scholarship grants, Benji was voted unanimously as the best qualified applicant for the Haring Scholarship award.

I was notified of this year's winners by Diane Zimmerman, AA3OF, chair of the FAR Scholarship Committee, on the Saturday morning of Field Day. After arriving at the FD site, I called Benji by cell phone to give him the good news, and found he was in New York City. But with only a little prodding, he agreed to get the next train home, and come to our Field Day site in time for dinner. After introducing him to the Field Day crew, and enjoying dinner together, we put Benji to work for the rest of the night at the 40-meter station, operating with Mike, N3MT, the winner of the first Haring Scholarship in 2002 !

Benjamin Jack, N3VYA, is entering his fourth and final year at Columbia University. You may remember his biography in the Blurb last September, noting his plans to major in Electrical Engineering, with a minor in music. What a difference a year makes! Benji will graduate next May with a degree in Applied Mathematics, and a minor in Economics. His involvement with music and the Columbia theater

Benji N3VYA, winner of the Claude H. Haring, Jr. W3IIM Memorial Scholarship for 2006

community remain strong, but he has recently become most interested in finance. This past Summer, Benji held an internship in Manhattan at Dunbar Capital, a fund of hedge funds. He plans to look for jobs in quantitative finance this Fall, and hopes, after graduation, to enter the "real world" in a position in investment

management. Luckily, Benji has been honing the public speaking and creative thinking skills one needs to succeed in finance by ragchewing, designing antennas, and more, as a ham for over ten years.

John Stratton AA3SL was awarded the PMRC Joann Hoch N3FTC Memorial Scholarship

Last year the Phil-Mont Board of Directors authorized a second scholarship grant, for the year 2006, in memory of Joann Hoch, N3FTC, the loving wife of Steve, WU3I, and an active and devoted member of our club for many years. The Joann Hoch, N3FTC, Memorial Scholarship, with \$2,000 grant, was also administered for us by the Foundation for Amateur Radio. Their scholarship committee voted to award the Hoch grant to John W. Stratton, AA3SL, of Glen Mills, PA.

John is a 21-year-old Extra Class licensee, and a student at Penn State University, where he studies

Agricultural Engineering. This year, however, he is spending a year studying abroad at the University of Queensland in Brisbane, Australia. Through informative conversations I had with his mother and aunt, I was able to learn a lot about John. And, armed with his email address, I was able to get in touch with him in Australia for further information.

John's father Joe, W3JBS, introduced him to ham radio at age 11 (including a visit and air time at our Franklin Institute station!). John started as a Novice, KB3BPS, and changed his call to AA3SL when he passed his Extra (**with** 20 wpm code, he was quick to point out to a fellow CW op). His main operating mode is CW, on 40 and 20 meters, using his homebuilt Elecraft K-1. He and his dad enjoy building and operating QRP CW rigs, and both are very active in the Chester County ARES/RACES club. John is an Eagle Scout from Troop 21, of East Goshen, PA. He serves as an instructor for two Chester County Science and Merit Badge Camps, week-long summer camping events for boy scouts, where he also teaches a Technician Class license course. Hopefully, when John returns to Pennsylvania, we will be able to meet him at one of our general meetings in Lafayette Hill.

Benji and John: **Congratulations!**

Phil-Mont is indeed proud to add you to our growing number of ham radio scholarship recipients. Our best wishes for a successful upcoming school year.

Dick
W3RM

Radio Jammer Gerritsen Gets Seven Years, Fines

ARRL, NEWINGTON, CT, Sep 19, 2006 -- It was a day many radio amateurs in Southern California had been anticipating for a long time. On September 18, US District Court Judge R. Gary Klausner sentenced convicted radio jammer Jack Gerritsen, now 70, to seven years imprisonment and imposed \$15,225 in fines on six counts -- one a felony -- that included willful and malicious interference with radio communications and transmitting without a license. Before sentencing, Gerritsen apologized to the federal government, the FCC and the local Amateur Radio community, which had endured the

brunt of Gerritsen's on-air tirades and outright jamming. "I'm sorry, and I apologize to everyone here," Gerritsen told those in the courtroom, which included more than a dozen radio amateurs and Gerritsen's family members. Gerritsen's contrition did nothing to convince Klausner toward leniency.

"How many times have you said you would not do this again?" Klausner reportedly asked Gerritsen, a repeat offender who served as his own attorney during his trial. "But based on your history, you come back again and again for this. I believe you will continue to do it, and it would send the wrong message to others, that five years is not long enough either!"

The sentence even exceeded US District Attorney Lamar Baker's rec-

ommended 46-month sentence. Gerritsen's court-appointed attorney suggested that a two-year prison term would be sufficient. Gerritsen could have received up to 15 years in federal prison. Sentences for his convictions on all counts will run concurrently.

Fines, Conditions Levied

In addition to the prison time, Klausner fined Gerritsen \$225, payable immediately, and an additional \$15,000 to be paid through the Probation Department. The judge also tacked on two years' supervised probation following his prison term, but he recommended Gerritsen remain in custody in Southern California during that period.

Klausner further ordered Gerritsen to participate in a substance-abuse program at his own expense. He told Gerritsen he could not identify himself by using any other means -- including his previously held Amateur Radio call sign KG6IRO -- but his real name, and he prohibited Gerritsen from owning, possessing or using any radio transmitting equipment.

Arrested in 2005

The FCC fielded complaints of illegal radio transmissions linked to Gerritsen for four years. According to court documents, the Commission's investigation and signal tracking revealed that Gerritsen transmitted both prerecorded messages and real-time harassment and profanity for hours at a time. He often targeted local Amateur Radio repeater systems, precluding their use by licensed operators, and hams were among the most vocal complainants.

In May 2005 FBI agents, accompanied by FCC staff, arrested Gerritsen without incident and seized his radio equipment. Released on \$250,000 bond while awaiting trial, Gerritsen remained in home detention, barred from possessing any radio equipment.

The FCC already had fined Gerritsen \$10,000 for violating its rules and the Communications Act during his reign of radio terror. Just days before his December 2005 trial, the Commission affirmed \$42,000 in additional fines -- two \$21,000 forfeitures. In doing so, the FCC rebuffed every argument Gerritsen offered in response to each *Notice of Apparent Liability*, including insistent "freedom of speech" claims. The government has yet to collect anything from Gerritsen.

Following his nearly four-day trial, Gerritsen, who lives in Bell, was found guilty on a felony count of causing malicious interference to a communications system operated by the United States -- the US Coast Guard Auxiliary -- during a 2004 search-and-rescue operation. He was convicted of misdemeanors for interfering with American Red Cross radio transmissions in early 2005 while the agency was preparing for disaster relief operations, and for causing the cancellation of a US Army Reserve homeland security training exercise in 2005 by interfering with the US Army Military Affiliate Radio System (MARS) communications. He also was convicted of transmitting on Amateur Radio frequencies without a valid license on three separate occasions in 2003 and 2004, all misdemeanors. The jury deliberated for less than an hour before returning its verdict December 9. Gerritsen has been in custody ever since.

Lengthy History

In imposing the harsh sentence this week, Klausner cited Gerritsen's 15 prior

misdemeanor convictions, which included transmitting from the roof of a court house and carrying a suspicious package into a federal office building. Gerritsen's actions could have caused lost lives when he interfered with the Coast Guard search-and-rescue operation, the judge said.

In 2000, a state court convicted Gerritsen of interfering with a California Highway Patrol radio system and sentenced him to a year in prison. After his release, Gerritsen in 2001 successfully passed the Amateur Radio Technician class examination, filed an application and received the call sign KG6IRO. Just days later, however, the Commission realized its error -- granting a license to someone convicted of interfering with Public Safety radio frequencies -- and set aside the license. Claiming the FCC could not revoke his operating privileges without a hearing, Gerritsen continued to identify as KG6IRO in some of his transmissions.

The FCC reportedly received substantial assistance from the Federal Bureau of Investigation in pursuing the Gerritsen investigation. West Coast radio amateurs complained for months about the slow pace of enforcement action in the Gerritsen case. Los Angeles-area repeater owners took to shutting down their machines to avoid a nearly constant barrage of malicious interference and lengthy political tirades attributed to Gerritsen.

Board of Director's Meeting September 6, 2006

Attending the meeting were Ed KB3IV, Bill W3AOK, Al W3STW, Dick W3RM, Eric N3QV, Steve WU3I, Maggie K3XS, and Fred WA3KIO.

Ed called the meeting to order at 8:07pm. Dick W3RM gave the treasurer's report with some dues in. Dick spoke about the Claude H. Haring W3IIN and Joanne Hoch N3FTC scholarships and for next year a scholarship in memory of Sam Kunceovich N3QIE who did the cover art for about 50 years for the Philmont Blurb.

Future programs were discussed including a possible talk on the Pennsylvania Turnpike radio system. A memorial was planned for Perry W3PTB on Saturday September 16 at the Masonic Village where Perry had been a resident. A donation was made to the Masonic Village.

A letter was read from Jim W3BBB about the future of the repeater. A motion was made to appoint Dick W3RM as trustee for the W3QV repeater. It was seconded. Steve WU3I and Eric N3QV will be on the repeater committee. Steve reported that a n upgraded computer was installed for Echolink. Bill W3AOK reported that the UHF amplifier was out and he had a temporary one in it's place until the other one can be repaired.

Ed KB3IV reported that nets were running fine. Maggie K3XS reported the website is fine. No new members this month.

With no other old or new business, the meeting was adjourned at 9:35pm.

73 de WA3KIO

General meeting September 13, 2006

24 people including members and guests were in attendance. Ed KB3IV called the meeting to order at 8:01pm at the Masonic Village. He reported that a tribute to Perry W3PTB was in this month's Blurb.

Ed reported that the nets were running fine.

A new directory supplement will be mailed with the October Blurb. Maggie K3XS is looking for articles for the Blurb. Gene N3XKE reported no new members.

One of our newest members, Andrew KC2PMW, appeared in the newest CQ magazine.

Steve WU3I reported that he upgraded the Echolink computer which should help eliminate down time.

Carmen KE3QB reported on up coming public service events. Brian's Run in December.

It was announced that the Atlantic Division Awards Committee named Dick Moll W3RM as Amateur of The Year.

Dick gave the treasurer's report; only income this month was from dues.

Dick reported that Benjamin Jack N3YVA was the recipient of the Haring Scholarship this year. The Joanne Hoch award was won by

John Stratton AA3SL. A new scholarship is being planned for next year in memory of Sam Kunceovich N3QIE who was the Blurb cover artist for over 50 years.

Dusty ND3Q announced there would be a VE session September 14 at Northeast High School. October 5th would be the next session.

Larry K3HWE reported that the ARES net is running regular now with about 20 members checking in.

Al W3STW will head the nominating committee as elections will be in December.

Bill W3AOK reported that the UHF amplifier was down and he had a temporary one in it's place until the other one is returned. The repeater is running fine otherwise. Ed called a motion to close the meeting. The meeting ended at 8:57pm.

At this time, the mike was turned over to Bill W3AOK with a timely talk on ways to hook up radios especially with the up coming MS150 event.
